Designing for Office 365 Infrastructure

3 DAYS

This three day course provides guidance on designing an infrastructure that supports a quick, efficient, and painless deployment of Office 365. Every successful software deployment begins with foundation design activities that provide the blueprint for constructing the software implementation plan. This course focuses on the design activities that must be addressed to successfully deploy both basic and advanced implementations of Office 365.

Modül 1: The Office 365 Deployment Challenge

Reviewing Office 365
Introducing the FastTrack Deployment Methodology
Getting to the Pilot

Modül 2: Planning the Pilot Phase

Overview of the Pilot Phase
Identifying Environmental and Software Prerequisites
Planning for Pilot Users
Planning for Team Collaboration

Modül 3: Planning the Deploy Phase - Part 1

Overview of the Deploy Phase
Planning Service Selection
Planning Networking and Domains
Planning User Management

Modül 4: Planning the Deploy Phase – Part 2

Planning Email Migration
Planning SharePoint Site Collections and sites
Planning Lync Online
Planning Office 365 ProPlus Deployment

Modül 5: Planning the Enhance Phase – Part 1

Overview of the Enhance Phase
Planning Single Sign-On
Planning Hybrid Exchange Deployments

Modül 6: Planning the Enhance Phase – Part 2

Planning Exchange Online Protection
Planning SharePoint Online Customization
Planning Hybrid SharePoint Implementations
